

banchetto

## Care and Maintenance

---

In efforts to preserve the aesthetic quality of banchetto surfaces, banchetto should always be kept clean and dry, even when not in use. Below are the recommended tools and methods to keep its surfaces clean and stain-free for long-lasting use.

### —<sup>1</sup> KompacPanel Table Top

Use microfibre cloth and mild detergent to remove dirt and spills. Apply light pressure with soft-bristled brush or sponge for removal of stains and stubborn residues.

### —<sup>2</sup> Powder-Coated Table Legs

Apply glass cleaner on microfibre cloth to remove light dirt and grease stains. For stubborn residues, apply warm water and mild detergent.

#### **Never clean with bleach or chlorine.**

Always use mild or environment-friendly detergents only.

---

#### **No direct heat contact.**

Always use heat pads and pot holders when placing hot dishes and cookware.

---

#### **Avoid water ponding.**

Any spills should be cleaned as soon as possible to prevent bubbling.

---

#### **Be careful when handling sharp tools and utensils.**

Excessive force may pierce and/or cause irreversible damage to the table surface.
